

National Weather Service Tallahassee, Florida

Tropical Storm Warnings Issued for Coastal Big Bend Tropical Depression #3

Current Position and Discussion

Tropical Depression #3

- TD 3 has formed just north of the Yucatan Peninsula with maximum winds near 35 mph. TD 3 is expected to move northeast across the eastern Gulf and move across the Florida Big Bend Coast Monday afternoon.
- Some strengthening is expected with sustained winds of 45-50 mph at landfall. The strongest winds will be confined to the immediate coast and coastal waters.

Heavy Rain Threat

- Heaviest rain expected starting late tonight continuing through Monday evening.
- Highest rainfall totals of 4+ inches expected over the eastern Big Bend.
- Given the relatively dry conditions of the past few weeks, widespread flooding is not expected.
- However, locally heavier amounts may lead to Flash Flooding in a few locations.
